The table given below shows the annual vital rates for each of the years 1957—61 for all municipal towns, each with population 30,000 and over based on the final yearly data. The corresponding annual rates for 1961 and various periods in 1962 compiled from the weekly figures, which were published from time to time in this Supplement, are also shown to draw attention to their possible use in tracing current trends.

Appropriate adjustments in the population base were made in cases, where the data for any town could not be included. The rates for States not shown are much too deficient for being presented. Even the data for States, which are shown are deficient to a varying degree. Efforts have to be made to improve the completeness.

The two sets of rates for 1961—one based on the annual returns and the other on weekly returns—are presented to give an idea of the $e^{irpnt} \text{ of } Mri \gg r i t t o \wedge n$ the final and the weekly figures. The two agree closely in the case of Gujarat, Punjab and Orissa only, otherwise for other States the difference is quite appreciable. However, the rates for all the eight States combined agree fairly well showing that, perhaps with emphasis on the improvement of the completeness of State figures, they may help in a study of current trends.

तीस हजार या उससे अधिक जनसंख्या वाली नगर पालिकाओं के जन्म तथा मृत्यु दरों नीचे दी हैं। वे दरें वर्ष के अन्त तक प्राप्त किए आंकड़ों पर निर्धारित हैं। समय-समय पर जो साप्ताहिक आंकड़े इस परिशिष्ट में प्रकाशित हुए हैं उन पर निर्धारित 1961, 1962 $\wedge t 4!fa^{*1}$ दरें भी दी हैं। संभवतः इन दरों से वर्तमान प्रवृत्तियों का अनुमान लगाने में उपयोग किया जा सकता है। अगर किसी नगर के आंकड़े प्राप्त नहीं थे तो उसकी जनसंख्या भी दर निकालने में छोड़ दी गई है। कुछ प्रदेशों की दरें इसलिए नहीं दी गई हैं कि वे बहुत ही अपूर्ण हैं। जिन प्रदेशों का विवरण भी दिया है उनकी दरें ir कहीं अधिक, कहीं कम अपूर्ण हैं। इनको पूर्ण करने के लिए प्रयत्न करना होगा।

अन्तिम व साप्ताहिक आंकड़ों में कितना भेद है इसका अनुमान उन पर निर्धारित वार्षिक दरों से किया जा सकता है। केवल गुजरात, पंजाब और उड़ीसा के दोनों दर बहुत कुछ मेल खाते हैं। परन्तु अन्य सभी प्रदेशों की दरों में बहुत कुछ अन्तर है। अन्यथा संयोजित आठ प्रदेशों की दरें बहुत कुछ मिलती-जुलती हैं। जिससे यह प्रतीत होता है कि यदि प्रदेशों के आंकड़ों को पूर्ण करने के लिए प्रयत्न किया जाए तो साप्ताहिक आंकड़े भी वर्तमान प्रवृत्तियों के अध्ययन करने में उपयोगी हो सकते हैं।
